

Nems AGM

Security report 2019/2020

As in previous years, there is a constantly higher number of attacks against the Jewish community which we need to be vigilant against and wary of.

As a community we take security very seriously and with the invaluable help of CST we provide consistent security at all of NEMS events.

We have a core group of volunteers who generously give their time when asked to do so and we should be grateful for their generous contributions.

This past year has been a strange one for us. We started the year at SWESRS, where we worked together with their members to provide a high level of security. We then transferred to Clore Tikva where security was already a high priority which made our role very easy.

We have had a contribution from CST of our own Stab vests which we can use at all of our events, wherever they are held.

We soon hope to start our in-person services again and I looking forward to working with all of our security volunteers.
